Kometa

Technical highlights

- **Flexible layouts:** ES+IN and ES+2IN
- **From 0.6 (standard) up to 1.1 kg canisters** for coffee beans
- Canisters for **powder** products:
 - from ~0.9 (standard) up to ~1.4 kg for chocolate
 - from ~0.3 (standard) up to ~0.45 kg for milk
- **Z4000** Coffee brewer available with three different capacities:
 - 8gr, 14gr and 16gr
- **Coffee boiler** with 0.5 lt capacity
- **Available in two versions:** direct water mains or 2.5lt water tank connection (under development)

Kometa

The dispensing area

The delivery area is **16 cm high** and can host larger glasses, such as 16 oz. A specific **movable cup holder**, which is easy to remove and clean, can be fixed at **two different levels**: 8 cm to get the perfect espresso cups and 10 cm for higher cups.

A great innovation comes with Kometa: in fact, **the waste bucket can be removed for cleaning by leaving the drip tray in place**, and vice versa.

*Or direct ground disposal kit
**Direct connection with drain kit

Grazie.
